INDEX: VOLUME 23

AUTHORS AND SUBJECTS

Adaptation 99–108.
Administrative performance, assessing 45–48.
Affinity group representation 429–440.
Ambiguous figures 318–334.
Arbitration 446–456.
Attitude theory 335–350.
Attitudinal change 351–354.
Balasko, Yves. The behavior of economic equilibria: A catastrophe theory approach. 375–382.
Bargaining, bilateral monopoly 73–85.
Bargaining strategies 470–477.
Banzhaf index of power 130–131.
Batell, Mark F.: see Frank Harary.
Bavelas, Janet Beavin. Systems analysis of dyadic interaction: Prediction from individual parameters. 177–186.
Behavior, hormones and 67–72.
Behavior, individual 177–186.
Behavior, theory of 120–129.
Behavioral science applications, 383–389.
Benham, Craig J., & Kozak, John J. Catastrophes in statistical biophysics. 355–359.
Berlinski, David: see book reviews, T. Poston & I. Stewart.
Book Reviews:
  Poston, T., & Stewart, I. *Catastrophe theory and its applications:* A critical review, (David Berlinski, rev.) 402–416.
Borda count 38–44, 169–176.
Bowers, R. G. Statistical dynamic models of social systems: Discontinuity and conflict. 120–129.
Bowers, R. G. Statistical dynamic models of social systems: The general theory. 109–119.
Brain hemispheres 421–428.
Cargal, James M. An analysis of the marriage structure of the Murngin tribe of Australia. 157–168.
Cassidy, Gordon R., & Turner, Ronald E. Criminal justice system behavior. 99–108.
Catastrophe models 291–317.
Catastrophe theory 1–14, 120–129, 318–334, 335–350, 351–354, 355–359, 360–374, 375–382, 383–389, 390–401, 402–416.
Cause 213–224.
Cellular determination 390–401.
Chamberlin, John R. The logic of collective action: Some experimental results. 441–445.
Change, abrupt 335–350.
Chidley, J., Lewis, P., & Walker, P. The cusp catastrophe as a market planning aid. 351–354.
Child-sibling subsystem 225–233.
Coalitions 195–208.
Cobb, Loren. Stochastic catastrophe models and multimodal distributions. 360–374.
Cognition 318–334.
Cognitive behavior 271–290.
Collective behavior 120–129.
Collective choice 15–20.
Collective goods 441–445.
Colmar, Andrew M., & Pountney, Ian. Borda's voting paradox: Theoretical likelihood and electoral occurrences. 15–20.
Conflict resolution 470–477.
Constituent pressure 470–477.
Control theory 135–147, 457–469.
Copeland procedure 38–44, 169–176.
Corrections, social 148–156.
Cost optimization 32–37.
Criminal justice 99–108.
Critical review, catastrophe theory 383–389, 402–416.
Decision criteria 256–263.
Decision making 15–20, 45–48, 351–354, 470–477, 478–485.
Decision making, group 429–440, 441–445.
Decision processes, group 209–212.
Decrementalism 457–469.
De Greene, B. Kenyon. Force fields and emergent phenomena in sociotechnical macrosystems: Theories and models. 1–14.
Democratic theory 15–20.
Design of experiments 73–85.
Deterministic and probabilistic models 478–485.
Deviance 148–156.
Dewit, D. B.: see L. M. Ward.
Differential topology 375–382, 402–416.
Direct effects 225–233.
Discontinuity and conflict 120–129.
Diskin, Abraham, & Felsenthal, Dan S. Decision making in mixed situations in which both chance and a rival player are confronted simultaneously 256–263.
Dog aggression model 383–398.
Dyads 86–98, 177–186.
Dynamic systems 109–119, 291–317.
Economic equilibrium 375–382.
Educators 45–48.
Effort allocation 234–255.
Electoral College 21–31.
Empirical testing 335–350.
Employee turnover costs 32–37.
Epidemiology 360–374.
Epigenetic landscape 390–401.
Equifinality 99–108.
Equilibrium, statistical 109–119.
Equity 446–456.
Equity theory 73–85.
Ergodic probabilities 209–212.
Experimental paradigm 73–85.
Exploitation hypothesis, test of 441–445.
Family system 225–233.
Fararo, Thomas J. An introduction to catastrophes 291–317.
Feiring, Candice, & Lewis, Michael. The child as a member of the family system. 225–233.
Felsenthal, Dan S.: see Abraham Diskin.
Field theory 1–14.
Flay, Brian R. Catastrophe theory in social psychology: Some applications to attitudes and social behavior. 335–350.

INDEX: VOLUME 23

Flood, Merrill M. Let's redesign democracy. 429–440.
Form and parameters, variation 478–485.
Free rider 441–445.
Freeland, James R., & Stabell, Charles R. Allocation of Managerial Effort: An investigation of the relationship between decision strategies, environment and performance. 234–255.
Game, simple 21–31.
Game theory 195–208.
Game theory, mixed situations 256–263.
Game, weighted voting 130–131.
Games, two-person 256–263.
General systems 135–147.
General systems approach 213–224.
Graph analysis 213–224.
Graph theory 264–270.
Group interactions 470–477.
Group size 441–445.
Harary, Frank, & Batell, Mark F. The concept of negative information. 264–270.
Heckathorn, Douglas. A paradigm for bargaining and a test of two bargaining models. 73–85.
Indirect effects 225–233.
Influence strategy mixes 86–98.
Information theory 264–270, 421–428.
Inoguchi, Takashi, & Miyatake, Nobuharu. The politics of decrementalism: The case of Soviet-Japanese salmon catch negotiations, 1957–1977. 457–469.
Instability in impure phases 355–359.
Interactions 67–72, 120–129.
International trade theory 375–382.
Intra- and intergroup correlation 67–72.
Jones, Bobbie J.: see Warren T. Jones.
Jones, Warren T., & Jones, Bobbie J. The use of discrete digital simulation for assessing administrative performance. 45–48.
Kozak, John J.: see Craig J. Benham.
Kraemer, Helena Chmura. Individual and ecological correlation in a general context 67–72.
Language 421–428.
Leung, Patrick. Sensitivity analysis of the effect of variation in the form and parameters of a multiattribute utility: A survey. 478–485.
Lewis, Michael: see Candice Feiring.
Lewis, P.: see J. Chidley.
Lobbying 21–31.
Macromolecular processes 355–359.
Majority rule 38–44, 169–176.
Manpower planning 49–60.
Market exchange 375–383.
Market planning aid 351–354.
Markov chains 187–194, 209–212.
Marriage structures 157–168.
Marschak, Jacob 63–66.
Mass, Nathaniel J. Managerial recruitment and attrition: A policy analysis model. 49–60.
Mathematical biology 390–401.
Mathematical modeling 109–119.
McClelland, Gary, & Rohrbaugh, John. Who accepts the Pareto axiom? The role of utility and equity in arbitration decisions. 446–456.
Memorial: Jacob Marschak 63–66.
Meyer, Peter B.: see Kevin N. Wright.
Miles, Robert H.: see William D. Perreault, Jr.
Milsum, J. H.: see L. M. Ward.
Mixed motives 195–208.
Miyatake, Nobuharu: see Takashi Inoguchi.
Modeling large systems 1–14.
Modeling, nonlinear 318–334.
Models, dynamic simulation 49–60.
Models, dynamic social 157–168.
Models, mathematical 32–37, 209–212.
Models, multiattribute utility 478–485.
Models, simulation 45–48.
Models, state space 457–469.
Models, statistical dynamic 120–129.
Models, stochastic 360–374.
Models, theoretical 67–72.
Morphogenesis 291–317, 390–401.
Multimodal distributions 360–374.
Multivariate analysis 86–98.
Murnighan, J. Keith. Strength and weakness in four coalition situations. 195–208.
Nash model 73–85.
Negative entropy 99–108.
Negotiation 457–469.
Nevison, Christopher H., Zicht, Barbara, & Schoepe, Suzanne. A naive approach to the Banzhaf index of power. 130–131.
Normative theory 264–270.
Nowakowska, Maria. A model of participation in group discussions. 209–212.
Organizational performance 49–60.
Organizations 32–37.
Ovenden, M. W.: see L M. Ward.
Parameter estimation 360–374.
Parent-child subsystem 225–233.
Pareto optimality 446–456.
Pendse, Shripad G. Category perception, language and brain hemispheres: An information transmission approach. 421–428.
Perception, multistable 318–334.
Perception of categories 421–428.
Perreault, William D., Jr., & Miles, Robert H. Influence strategy mixes in complex organizations. 86–98.
Personnel training policies 49–60.
Polarization phenomena 120–129.
Policy planning, managerial turnover 49–60.
Population density 213–224.
Poston, Tim, & Stewart, Ian. Nonlinear modeling of multistable perception. 318–334.
Pountney, Ian: see Andrew M. Colman.
Power 21–31.
Power, measure of 130–131.
Power and persuasion 86–98.
Presidential campaigning 21–31.
Pricing behavior 351–354.
Production system 271–290.
Protein denaturation 355–359.
Psychological phenomena 335–350.
Radner, Roy. Jacob Marschak. 63–66.
Rationality, bonded 234–255.
Regression methods 187–194.
Requisite variety 148–156.
Research design 67–72.
Rechelson, Jeffrey T. A comparative analysis of social choice functions, II. 38–44.
Rechelson, Jeffrey T. A comparative analysis of social choice functions, III. 169–176.
Rohrbaugh, John: see Gary McClelland.

Ross, J. A.: see L. M. Ward.
Scheduling 271–290.
Schoepke, Suzanne: see Christopher H. Nevison.
School principals, elementary 45–48.
Sengel, Randal. A graph analysis of the relationship between population density and social pathology. 213–224.
Sensitivity analysis 478–485.
Shapira, Zur: see Itzhak Venezia.
Simulation 234–255, 271–290.
Simulation, computer 1–14.
Slusher, E. Allen. Counterpart strategy, prior relations, and constituent pressure in a bargaining simulation. 470–477.
Social choice 38–44, 169–176.
Social control 148–156.
Social system, open 109–119.
Social pathology 213–224.
Social science, mathematical 291–317.
Social welfare functions 446–456.
Societal systems 157–168.
Sociotechnical macrosystems 1–14.
Soviet-Japanese fishery negotiations 457–469.
Speaking frequencies, group 209–212.
Stabell, Charles B.: see James R. Freeland.
Statistical dynamics 109–119.
Statistical thermodynamics 355–359.
Steady states 225–233.
Stewart, Ian: see Tim Poston.
Strength and Weakness 195–208.
Structural stability 291–317.
Structural stability applications 402–416.
Sussmann, Hector J., & Zahler, Raphael S. A critique of applied catastrophe theory in the behavioral sciences. 383–389.
System behavior 99–108.
Systems adaptation 148–156.
Systems, large scale 135–147.
Systems methodology 177–186.
Systems theory 421–428.
Target person characteristics 86–98.
Theory content 271–290.
Time series analysis 187–194.
Tuggle, Francis D. Analysis of employee turnover 32–37.
Tuggle, Francis D. Theory content and explanatory power of simulation models. 271–290.
Turner, Ronald E.: see Gordon R. Cassidy.
United Kingdom election 15–20.
Utilities, interpersonal 429–440.
Utility 446–456.
Venezia, Itzhak, & Shapira, Zur. The effects of type of forecasting model and aggregation procedure on the accuracy of managerial manpower predictions. 187–194.
Voluntary employee turnover 32–37.
Voter, winning coalition swing 130–131.
Voting 38–44, 169–176.
Voting, dynamic value 429–440.
Voting paradox 15–20.
Voting procedures 429–440.
Walker, P.: see J. Chidley.
War model 383–389.
